ABOUT US

The NUS Overseas College (NOC) Internship combines academics and professional work experience cohesively into one program. The program is offered in the winter and summer terms, from January to July. U of T will support students in securing their internship.

Students gain a foothold in entrepreneurship, start-ups, and technological innovation through seminars and a choice of 1 or 2 introductory courses throughout the term.

Students are matched with start-ups in Singapore, one of the leading entrepreneurial cities in the world. Students will immerse themselves into Singaporean work culture, and create meaningful, professional connections that will last a lifetime.
