Master of Management of Innovation

*Info Session*

*for science and engineering students*

Tuesday, January 16, 2018 @ 12:00 p.m. - 2 p.m.

University of Toronto, St. George Campus – Bahen Centre, Rm. BA 2179

The Master of Management of Innovation (MMI), University of Toronto, is an accelerated 12 month full-time program. The program attracts students with science, engineering and technology backgrounds. MMI prepares students with the knowledge, skills and strategic perspectives required to become leaders and senior managers.

Our curriculum provides a strong foundation in economic analysis, technology management, business strategy, finance, accounting, marketing and policy. The required academic core courses focus on management and economics; students select three electives tailored to their interests and goals.

In 2016 we have introduced a mandatory internship requirement to the MMI. Students must complete the internship in order to be eligible for graduation. The internship allows students to gain valuable, real-world work experience and an opportunity to demonstrate the key competencies the MMI program has taught them.

The MMI program bridges the gap between science/engineering and business!
