

University of Toronto

Student Position

Enterprise Applications and Solutions Integration

Position: Student – User Experience Design (1 position)
Part Time: April 20th, 2018 – August 29th, 2018
Hours: Full Time (7.25 hours/day)
Salary: \$20/hour

Background and Position Description:

The Enterprise Applications and Solutions Integration (EASI) department within the Chief Information Officer's (CIO) Division is a central department responsible for all matters pertaining to the development, maintenance and effectiveness of the core administrative management and student systems at the U of T. Included within these responsibilities are all central SAP systems such as Financial Services, Human Resources, Research Administration and Procurement; the central U of T Student System (ACORN/ROSI database); approximately 40 related vendor and specialized web applications, as well as central Business Intelligence applications.

Reporting to the Manager, User Experience & Process Design on the St. George campus, this student summer position will work with the User Experience (UX) and Development teams to implement a new online student service web application, as well as assist the UX team in coordinating research activities.

Qualifications:

- Currently enrolled in an Information Technology, User Experience (UX), Business, or Marketing degree or college program
- Proficiency in front-end web development via Angular.js (v1.5), Bootstrap frameworks (v3.3+)
- Proficiency in Microsoft Office suite of software
- Familiarity with design, wireframing, prototyping software an asset (e.g. Sketch, Balsamiq, Axure)
- Familiarity with testing frameworks an asset (e.g. Jasmine, Protractor)

Duties:

- In conjunction with the UX and Development teams, develop a new online student service that will implement the UX team's design intent and adhere to the Development team's established best practices for agile web application development using Angular.js v1.5 and the Bootstrap framework
- Participate in team code reviews and quality assurance testing to ensure a high standard of work
- With guidance from the User Experience Design Manager, coordinate user research activities
- Assist UX team in the design, development and conducting of usability testing and other research
- Document research and observations, report findings and UX team recommendations/next steps
- Assist UX team in day-to-day user experience activities (e.g. research, design, prototyping)

How to Apply:

Interested applicants should send a cover letter and resume to Mike Clark: mikej.clark@utoronto.ca

Deadline to Apply: March 30, 2018
