Working Towards a More Inclusive Tech Culture by Empowering Women in AI

AI for Good

Summer Lab

May 8 June 21

The AI For Good Summer Lab applications are now open !
Leverage your creativity, leadership, and technical skills to generate AI solutions to some of the world's most pressing problems.

The AI For Good Summer Lab takes place over 7 weeks (May 8 to June 21 2019) and brings together a cohort of up to 30 women from across Canada. The program consists of a mashup of lectures, workshops, a hackathon, and self-directed team projects. Instructors and mentors include university researchers, graduate students, and practitioners from startups, corporates, inter-governmental organizations and city government.

What should you expect from the Lab?
Receive intensive technical training and mentorship in AI.
Expand your network with the **Canadian AI ecosystem**
Work in teams on an AI for social good project and pitch it at a demo night

Who qualifies
This program is open to women who are registered with a post-secondary institution at the undergraduate level (or have graduated within the last 2 years) in STEM fields and have prior experience with coding and advanced math (calculus, linear algebra, stats).
